The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-15 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Tsao '689, for the reasons given in the last Office Action. Applicant's argument, that Tsao '689 teaches an isotonic low concentrated hydrogen peroxide solution having a sodium ion content based on the weight of hydrogen peroxide that is higher by several magnitudes than the upper limit for the alkali metal concentration according to the claims herein, is not convincing. Tsao '689 discloses at col. 3, lines 51-68 that there "may" be present in the stabilized hydrogen peroxide solution one or more tonicity enhancing agents. Moreover, tonicity enhancing agents do not appear to be present in the hydrogen peroxide solution disclosed at col. 4, lines 55-65 of Tsao '689. In any event, it would be obvious to exclude the tonicity enhancing agents in the composition of Tsao '689, since Tsao '689 merely "prefer" that such agents be present (col. 3, lines 51-68). It is well-settled

that nonpreferred embodiments constitute teachings upon which a case of prima facie obviousness may be based.

Claims 16-18 are objected to as based on rejected parent claims, and would be allowed if written in independent form.

Claims 19-27 are allowed. However, it is suggested that the term "drying of" be changed to - - drying - - in step (f) to render the grammar consistent with the rest of the claim.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
